

Science, Education and Innovations in the Context of Modern Problems (SEI)

Sci. Educ. Innov. Context Mod. Probl.

Science, Education and Innovations in the Context of Modern Problems (SEI) is an international, peer-reviewed, open-access academic journal that publishes cutting-edge research in the fields of science, education, technology, innovation, and interdisciplinary studies. Established in 2018, the journal operates under the umbrella of IMCRA, demonstrating a strong commitment to academic excellence, rigorous research ethics, and global accessibility. SEI fosters interdisciplinary dialogue and emphasizes the dynamic interplay between science, educational development, and technological innovation. The journal prioritizes research that addresses contemporary global and regional challenges, promoting evidence-based solutions to advance knowledge and societal progress.

Science, Education and Innovations in the Context of Modern Problems is an international, peer-reviewed academic journal that publishes original research at the intersection of science, education, and innovation. The journal promotes the practical application of scientific and technological advancements—particularly within educational systems—and welcomes interdisciplinary studies that are original, relevant, and impactful. In addition to education-focused research, the journal provides a platform for scholarly work in the **social sciences, pedagogical sciences, and technical disciplines**, with a special emphasis on **energy, robotics**, and other fields driving innovation. The journal is published entirely in English, with select articles also available in French to engage a broader international readership.

Focus

The primary aim of *Science, Education and Innovations in the Context of Modern Problems* is to foster the integration of science, technology, and education—particularly by promoting the application of cutting-edge scientific and technological innovations in educational and societal contexts.

Archaeology	Environmental Studies and Sustainability	Linguistics
Artificial Intelligence	Environmental and Resource Law	Marketing and Consumer Behavior
Banking and Finance	Food Sciences	Metallurgy and Material Sciences
Built Environment and Design	Geography and Regional Planning	Pedagogical and Educational Research
Business and Management	Heritage, History, and Anthropology	Psychology and Cognitive Science
Business Systems in Context	History of Science	Robotics and Intelligent Systems
Condensed Matter Physics	Human-Centered Computing	Science and Technological Innovation
Creative and Professional Writing	Human Society and Social Change	Social and Economic Geography
Cybersecurity and Privacy	Interdisciplinary Social Science Research	Social Statistics and Informatics
Commercial Law	International and Comparative Law	Sociology and Social Work
Curriculum and Pedagogy	Languages and Literature	Software Engineering and Information Systems
Demography	Law, Media, and Communication Studies	Strategy, Management, and Organizational Behavior
Econometrics	Library and Information Science	Urban and Regional Planning
Economics (General, Theory, and of Education)		Veterinary and Life Sciences
Educational Sciences		

The SEI Journal particularly values interdisciplinary research that bridges gaps between scientific discovery, technological development, and educational practice. We are committed to fostering scholarly dialogue that supports global academic progress and practical innovation.
